AN EXCITING OPPORTUNITY FOR YEAR 7 AND 8 STUDENTS TO EXPERIENCE NEW ACTIVITIES AND LEARNING AT OUR FREE SUMMER SCHOOL 2021

Our Summer School Programme will be jam-packed with exciting experiences involving workshops (including cooking, science, robotics, visual arts, Ted Talks/debating, puppet making and bush crafts) led by a collective of professional workshop creative experts working alongside SGHS teachers. This is an opportunity for attendees to experience 5 days of summer fun. Students will enjoy new practical experiences, develop interests, increase their confidence and find hidden talents!

Mindful of the challenges of the past year, this programme will provide the opportunity for students to make new social connections in preparation for September and provide catch up learning after the challenges of the last year.

If you feel your child would benefit from this support and would like to take advantage of this fantastic opportunity, please register by completing the form on the following link by **Thursday 24th June.**
